

TASK 1

HONESTLY SPEAKING BOTH THE LIFE AND THE CLUBS COUNCIL WEBSITES WERE AWESOME, THE CLUBS COUNCIL WEBSITE WAS EVEN MORE SO, I COULD BARELY FIND ANY UI/UX ISSUES IN THESE WEBSITES, BUT BELOW ARE THE FEW I COULD FIND.

----->

**Note the gap between the text and the photos in the website
Due to this gap the text got clumsy**

Moreover

**When the same website was opened in a phone the effect
was different The text was not clumsy and was very readable**

And the major thing I noticed was the sliding pictures when opened in the phone and this feature's non availability when opened in a PC

LIFE@IIIT-H

IIIT H is where bright, committed, innovative people congregate to learn, live, play and work. Diverse in every sense of the word, our community is a fertile breeding ground for opportunity in the heart of one of the leading tech hubs of the country. “Work hard and play harder” is our unofficial motto and students choose their own extracurricular pursuits, from a jaw dropping cauldron of ways to participate in

I noticed a huge difference between the clubs website and the life website when coming to profiles and photos, In the clubs website the user can open every photo in a wide view, such a functionality is not provided in the life website, The photo gets toggled when scrolled over but doesn't have specific any onPressed() action.

^ the life website

^The clubs website

There are no profile records in the life website and in many cases it redirects to the clubs website

Under the SLC Events tab in the life website

Each Event box has an onScrolledOver description but the description is not completely visible nor is there any way to view it completely.

Location: Himalaya 105
Date: Friday, July 19th, 2024

Monica Mody is a poet, scholar, and educator, and the author of Wild Fin (Weavers Press, 2024), Bright Parallel (Copper Coin, 2023), and Kala Pani (1913 Press, 2013). Her writing ...

I did feel the calendars tab in the life website could be more better

9a Felicity Buzz						
2p HandBrawl						
3p REQUIEM-2K24						
3p Freshers' intro						
10a Sky's the limit						

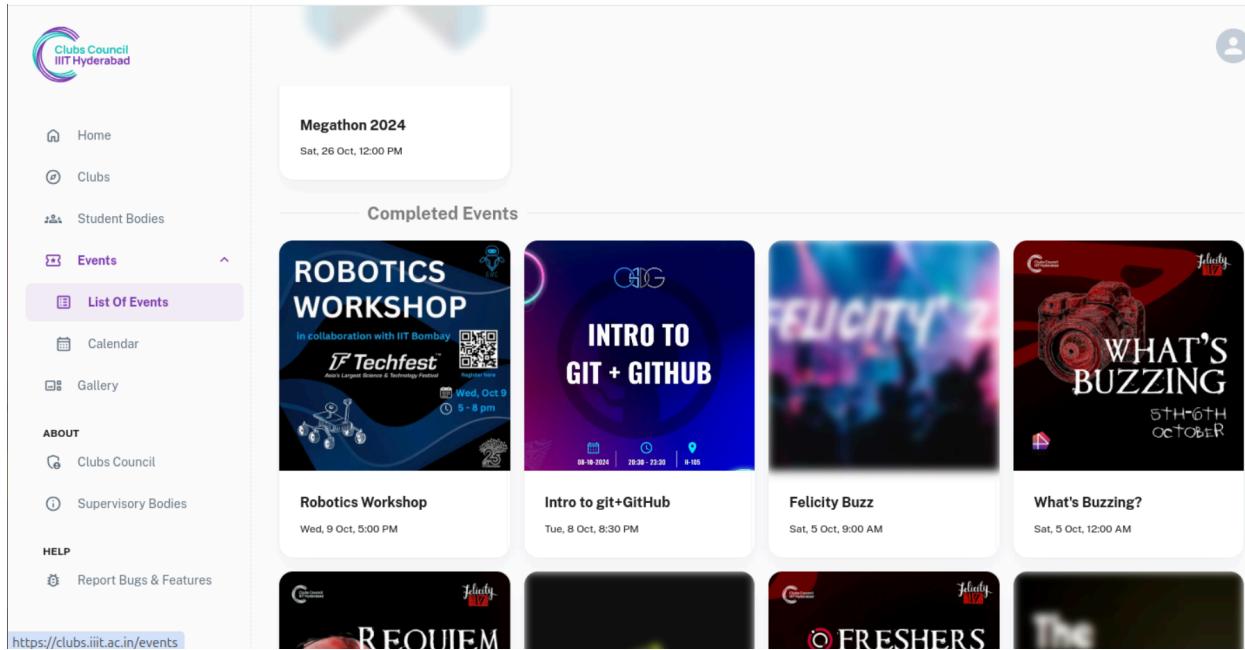

One issue I felt could be rectified in the clubs website is the blurring of images when no image was uploaded for the event boxes from the developers side

When I first opened the website I thought the blurring was to indicate that the event got canceled.

but later saw that felicity buzz was blurred

I then understood the reason.

And now MY SOLUTIONS:

- 1) I would try to make the life website more compatible across all platforms**
- 2) I would try to provide a wideview if any picture on the life website was clicked**
- 3) Under the SLC events tab I would provide add a onClicked() action to the Event boxes so as to see its complete description**
- 4) Remove the blurring effect on the event boxes in the clubs website**
- 5) Try to make the calendars tab on the life website better.**
